Top reviews from the United States

Justice Williams

★★★★★ **Still need convincing??**

Reviewed in the United States on January 18, 2021

Capacity: 4Gi128G SSD | **Verified Purchase**

I'm always hesitant with purchasing electronics on any marketplace (I.e Amazon) but everything is perfect and exactly what I've been looking for. It's worth the money you'll spend on it for sure! If you're anything like me I know you have to scroll through a few more reviews to be convinced but trust me when I tell you if ANYTHING and I mean ANYTHING was wrong from the time I purchased to the time I received my laptop I would say it. It also came super quick.

★★★★☆ **was suppose to be New - IS NOT**

Reviewed in the United States on February 11, 2021

Capacity: 4Gi128G SSD | **Verified Purchase**

Dell Inspiron 3583 15" Laptop Intel Celeron – 128GB SSD – 4GB DDR4 – 1.6GHz - Intel UHD Graphics 610 - Windows 10 Home in S Mode - Inspiron 15 3000 Series - this was supposed to be new. IT IS NOT. packed very poorly and cord not even put in carefully, dirty screen, dirty smudges over the entire thing... does not seem to be new so I am VERY disappointed and hope to hear from someone -Good news, AMAZON is following up and sending a NEW one.

Kelly

★★★★☆ **So far So good with this Dell Inspiron**

Reviewed in the United States on February 15, 2021

Capacity: 4Gi128G SSD | **Verified Purchase**

I use this for personal and business computing at home - currently independent contractor. Screen size is good - can use stand-alone (when I travel) but add larger screen at home for second screen. Keyboard is also fine for travel, which again I supplement at home with

separate key board. Could have used more ports but extension ports seem work fine. I am not a Google fan so the Microsoft suite (Excel, Word, Outlook, etc.) work fine for me - although Edge I am not crazy about. Google and other aps work fine.
I only gave 4 stars as every new computer set up is a pain. Dell has been a reliable partner of mine for years.

★★★★★ **Dell Inspiron 3583 15" Laptop Intel Celeron – 128GB SSD – 4GB DDR4 – 1.6GHz - Intel UHD Graphics**

Reviewed in the United States on February 1, 2021

Capacity: 4Gi128G SSD | **Verified Purchase**

As expected. It is fantastic! Light weight and well made. It performs smooth and quietly. We just needed a laptop for day to day office work and we had a small budget. The price was unbelievable and the performance has my two tombs up. The delivery was made way ahead of time, the package was well wrapped and padded. Wow! Thank you.

★★★★☆ **Small issues based on current chip shortage.**

Reviewed in the United States on April 28, 2021

Capacity: 4Gi128G SSD | **Verified Purchase**

The Dell model 3583 is specified (Dell Specs p.12) with an 8th generation Intel core i3, i5, or i7 CPU. I suspect due to the 'chip shortage' Dell was forced to dive into the ol' parts bin and ship this particular 3583 with an older - and MUCH lower specs - Pentium Gold 5th generation CPU with limited cache. To try to compensate, Dell also shipped this unit with a M.2 SSD rather than the spec'd spinning HDD. That was very good of them. But the mis-match seems to be creating some lag in 'getting things done', although not critical. I may (probably) be wrong about this, but then I'm not a computer whiz. It would be great if Dell eventually tracked this order and in future shipped us a comparable Core i3 CPU with a realistic cache. Hey, I can

dream! In addition - 3583 comes spec'd with Win 10 Home (not S mode). S mode sucks and the time it takes to dump it is a pain. 2cts.

★★★★☆ **" It Is Worth The Price, and, Then Some. "**

Reviewed in the United States on October 19, 2020

Capacity: 4Gi128G SSD | **Verified Purchase**

I am very happy with the laptop. Since all of the wireless mouse, that I have gotten, were not a success, it was great to find that, all I need use is a finger. Plus, it does have USB 2.0 (socket) that allows me to my corded mouse, and my printer.
